

the collision repair process

Contact Office

- *we arrange towing from accident site
- *we can arrange for rental car
- *we contact your insurance company

Estimate Damage

- *Preliminary estimate of damage
- *We get authorization from you to repair your vehicle

Insurance Approval

- *We work with insurance company that accepts responsibility for the cost of the repairs needed to restore your vehicle to its pre-accident condition.

Refinish

- *We use BASF Paint Systems
- *We use bisect-clear coat acrylic urethane painting and priming systems, with a lifetime 100% warranty

Frame or Unibody

- *Vehicle is mounted on frame machine jigs for measuring
- *Computerized measurement to insure exact factory specifications are used for repairs

Tear Down-Begin Repairs

- *Order & receive parts
- *vehicle is disassembled
- *Structural repairs begin

Reassemble Vehicle

- *Vehicle reassembled to pre-accident condition after painting is completed
- *Wheel alignment or any subcontract type work will be done at this time.

Wash & Quality Inspection

- *Vehicle is cleaned inside & out and inspected to insure all repairs have been completed for final delivery

Vehicle Delivery

- *Your vehicle is completed and ready for pick up. You and one of our team members will walk around your vehicle for your quality inspection
